Summary

BI Analyst with 4+ years of experience building Power BI, Tableau and Amazon QuickSight dashboards from SQL and healthcare operational data. Currently own EHR-based reporting, KPI dashboards, and data validation for 13 clinics, serving clinical and business leaders directly. Experienced in turning complex data into clear, practical insights and working directly with stakeholders to improve reporting and decision-making. Also bring hands-on AWS, Python, and analytics experience.

Experience

Business Intelligence Analyst | BestSelf Behavioral Health, Buffalo Oct 2024 - Present

- Built an Accounts Receivable Power BI dashboard with an integrated Power App, giving claims and billing teams a single interface to review claim history, add comments, and track whether services were billed or posted without switching to separate Excel files.
- Designed denial write-offs dashboard that helped the billing team identify payer trends and reduce claim denials, improving revenue flow by 12%.
- Built a real-time tableau dashboard for counselors and program directors of 69 programs across 13 clinics to track high-risk suicidal clients, enabling proactive intervention and reducing missed appointments by 27%.
- Created a compliance tableau dashboard to monitor HIPAA incidents, treatment plan completion, and documentation gaps, helping leadership identify process issues and improve internal controls.
- Build and maintain Tableau dashboards and SQL reports used by clinical and operational leaders to track patient access, service utilization, appointment attendance, and revenue cycle trends.
- Developed predictive models in Python to forecast client no-shows, helping clinics optimize scheduling.

Data Analyst | University at Buffalo, Buffalo Aug 2023 - Sep 2024

- Publication: SCREAM - Network Based Data Analysis in Omics Data
- Developed Single-cell multiomics technologies and advanced bioinformatics methods to address challenges in the analysis of high-dimensional omics data (8000 cells $\times$ 21000 gene expressions) using AnnData and Scanpy libraries along with Numpy, Pandas and Scikit-learn.
- Created deep learning framework for robust integration and clustering of multi-modal single-cell data.

Financial Data Analyst | Dark Horse Stocks, India Jan 2022 - Aug 2023

- Designed and managed dashboards in Amazon QuickSight to track portfolio performance, market trends, and client assets.
- Built automated data pipelines using SQL and Python to pull source data from AWS, optimizing backend performance to ensure analytics-ready datasets for reporting.
- Utilized QuickSight's calculation engine and parameters to deliver weekly market insights and investment recommendations, which helped increase client engagement by 8%.

Data Analyst | Saurashtra University, India Jun 2019 - Jan 2022

- Merged and cleaned data from multiple government databases using SQL, building a centralized system to track education metrics for 300,000 students.
- Translated complex statistical findings into clear narratives and dashboards within Tableau and QuickSight, making the data accessible and useful for non-technical stakeholders.

Skills

Programming: SQL, Python (*Scikit-learn*, *Pandas*, *NumPy*, *PyTorch*, *TensorFlow*), MATLAB, R, PostgreSQL, Shell

Softwares and Tools: Power BI, Tableau, Amazon QuickSight, GCP BigQuery, Cloud SQL, GCP Looker, Git, Microsoft Excel, Microsoft PowerPoint

Data Science Skills: Data Visualization, Predictive Modeling, A/B Testing, High-Performance Computing, Database Management, Data Integration, Statistical Analysis, CRM, Healthcare Data Analysis, Medicare Data, Survival Analysis

Cloud Environments: Google Cloud, Microsoft Azure, AWS, Snowflake

Education

Master of Science in Data Science | SUNY, University at Buffalo GPA: 4.00 Jun 2024

Master of Science in Applied Physics | The M. S. University of Baroda GPA: 4.00 Jun 2019

Certifications

Data Visualization with Tableau • Microsoft Certified: Azure Fundamentals • Database Management with PostgreSQL • Statistics with R Specialization • Deep Learning with PyTorch for Medical Image Analysis

Publications

Patel, P., et al. *SCREAM: Single-cell Clustering using Representation Autoencoder of Multiomics*. bioRxiv, 2025.
